

ROOFSAFE™ LO-PROFILE RAIL SYSTEM

# LOW-PROFILE SYSTEM WITH HIGH IMPACT

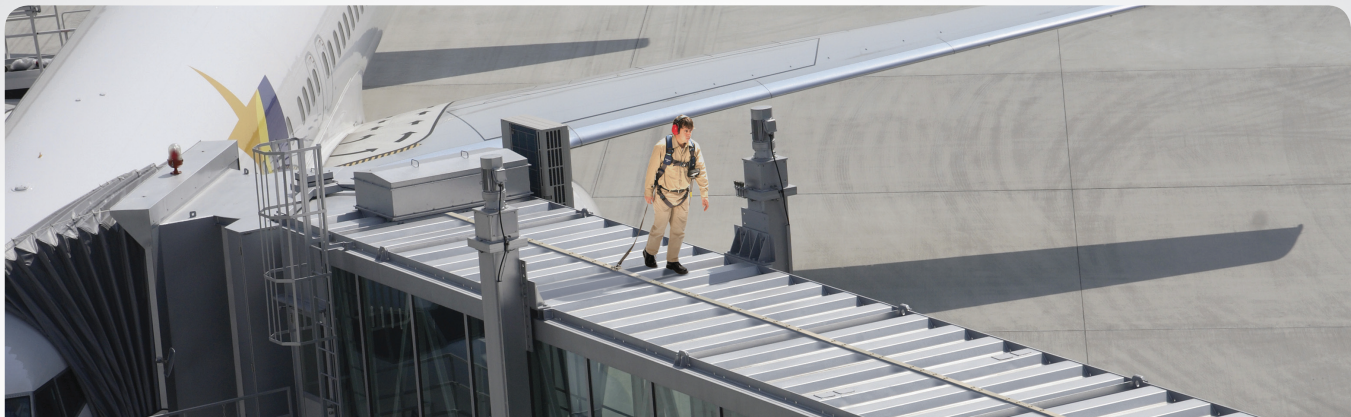

SLEEK • DISCREET • SMOOTH

THE ULTIMATE IN FALL PROTECTION

PRODUCT FLYER

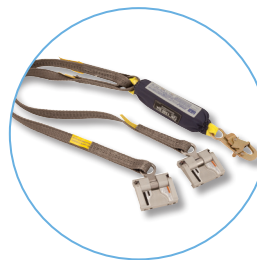

# ROOFSAFE™ LO-PROFILE RAIL SYSTEM

## SPECIFICALLY DESIGNED FOR JET BRIDGES

### PERMANENT HORIZONTAL RAIL SYSTEM

- Provides fall protection on telescoping jet bridges, allowing them to expand and collapse with no need to remove or retention the system
- Quality extruded aluminium rail system blends into structures and complements their aesthetics, virtually hidden and unnoticeable from the ground
- Rail shuttle glides effortlessly along the rail to provide superior hands-free and continuous fall protection
- Provides fall protection for up to three users

### HIGH CAPACITY SHOCK ABSORBING LANYARD FORCE2™

Is ideal for tying off at your feet, twin-leg design provides continuous protection and mobility when moving from one jet bridge section to another

### I-SAFE™ EQUIPPED

The most advanced way to track safety equipment and manage your safety inspection program

### COMPLETE KIT SOLUTIONS

Simple and easy to install
