

PERMA-LINE

A Permanent Visual Warning Line System *for Controlled Access Zones*

THE PERMA-LINE was designed for permanent placement of a Warning Line System for Roof Fall Protection and creating Controlled Access Zones. With this innovative system, you will no longer have to make monthly trips to your rooftop to replace torn or worn out plastic flagging. Once in place, the Perma-Line remains intact until you want to move it. Best of all, it's a non-penetrating system. The Perma-Line (Patent Pending) is not a motion stopping device. It is a highly visible warning barrier. It exceeds OSHA regulations for warning line systems. Please call us for more details. OSHA has had some recent interpretations on warning line systems. Please visit our OSHA web page for important links regarding the use of warning line systems.
